

Brainstorm & Idea Prioritization Template

Date	19 September 2022
Team ID	PNT2022TMID51836
Project Name	Project Emerging method for early detection of forest fires
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative

Group ideas

Take turns sharing your ideas with discussing similar or related ones as you go. Once all sticky notes have been grouped, give each cluster a common title. (It's okay if a cluster is bigger than six sticky notes, try and see if you can break it up into smaller subgroups.)

[30 seconds](#)

Priorities

Your team should all be on the same page about which implement making forward. Once your ideas are in the grid, determine which ideas are important and which are feasible.

[30 seconds](#)

After you collaborate

You can agree the most on an idea or get to show which members of your group are the most likely to happen.

cluster A

Early detection using unmanned Aerial vehicles

Utilising in neural network

Emerging method like sensor network

Based on Gaussian Model

Detection using wireless sensor network

Using cluster to determine GPS

cluster B

Fire detection using CNN model

Based on Gaussian mixture model

Monitoring forest fire using satellite

Importance

Importance of ideas based on how much they are being discussed and how many people are involved in the idea.

Feasibility

Feasibility of ideas based on how much they are being discussed and how many people are involved in the idea.

Quick address

1. How do we want to use the data? (We want to use it to help us in the long term to help the community of the country)
2. How do we want to use the data? (We want to use it to help us in the long term to help the community of the country)

Keep moving forward

1. How do we want to use the data? (We want to use it to help us in the long term to help the community of the country)
2. How do we want to use the data? (We want to use it to help us in the long term to help the community of the country)
3. How do we want to use the data? (We want to use it to help us in the long term to help the community of the country)
4. How do we want to use the data? (We want to use it to help us in the long term to help the community of the country)
